botanian  
BY Jiffy®

GROWING WHEREVER YOU CAN IMAGINE

# Why Botanian?

Plants are for everyone, but maybe not all of us realise. You don't need a garden or know all these complicated latin words to enjoy gardening.

Gardens are everywhere you imagine them. Could be your windowsill, but why not have some tropical plants in your bathroom? Or use the basket on your bike? Balcony you said?

Gardening is not just for people with big yards & years of experience, it's for everyone who would like to enjoy gardening.

# BE A BOTANIAN

and plants will grow wherever you imagine them.

**Want to develop your own range?** We sorted out the bestselling items for you. Select your products of preference on the last part of this catalogue. These products are delivered in regular boxes without any artwork. Which allows you to design your own range using the high quality Jiffy products.

All products in this catalogue are made by Jiffy Products International B.V. Jiffy, headquartered near the famous Dutch greenhouses, has been supplying premium growing media to the horticulture sector all over the world for over 70 years. It all started back then with the Jiffy Pot, and this portfolio has been expanded with various other propagation products over the past decades. These products set industry benchmarks in terms of quality, sustainability and convenience, and are now available to home gardeners of all levels.

# GROW POTS

No matter which product you pick from the Botanian product range, getting started is never difficult. Simple and easy to use - just add soil, water and seed.

Botanian Pots promote faster and stronger root growth compared to plastic pots. They make transplanting easier by preventing root disturbance and reducing root-zone temperature changes. The pots are therefore ideal for seed germination. The golden rule for which size to use is: the smaller the crop, the smaller the pot. Using these environmentally friendly and 100% biodegradable pots is the all-natural approach to plant propagation.

These Botanian Pots provide an earth-friendly alternative to growing plants.

The Botanian Pots are made of responsibly harvested peat. The peat-free Botanian Pots are made of sphagnum moss, which is a natural and renewable source.

# GROW STRIPS

No matter which product you pick from the Botanian product range, getting started is never difficult. Simple and easy to use - just add soil, water and seed.

Botanian Strips promote faster and stronger root growth compared to plastic strips. They make transplanting easier by preventing root disturbance and reducing root-zone temperature changes. The strips are therefore ideal for seed germination. The golden rule for which size to use is: the smaller the crop, the smaller the cavities. Using these environmentally friendly and 100% biodegradable strips is the all-natural approach to plant propagation.

These Botanian Strips provide an earth-friendly alternative to growing plants.

# QUICK SOIL MIX PELLETS

RESPON  
SIBLY  
SOURCED

Quick Soil Mix Pellets are a compressed, light weight, easy to use alternative for regular potting soil. The fine structure makes it perfect for sowing seeds or growing cuttings.

These Quick Soil Mix Pellets only require some lukewarm water to expand to a premium potting soil mix, ready to be used in the Botanian Grow Pots or Strips.

A single 38-mm Botanian Quick Soil Mix Pellet will fill a 6-cm round Botanian Grow Pot.

The Quick Soil Mix Pellets are made of responsibly harvested peat. The peat-free Quick Soil Mix Pellets are made of Coir, an eco-friendly byproduct from the coconut processing industry. We source and process our coconut husks responsibly.

# GREEN- HOUSE KIT

The Botanian Mini Greenhouse starter kit is the all-in-one solution for fast and effective propagation of seeds and cuttings. The perfect product for any starting or experienced grower.

Simple and easy to use - just add water and seeds! The watertight tray allows you to pour water straight into the re-usable tray, keeping the surroundings dry and clean.

You get more flowers, fruit, and veggies with Botanian Grow Pellets. That's because the plants' all-important root development isn't disturbed. When it's time to move your plants to a bigger container or to the garden, you simply transplant them with the Pellet intact (without removing the netting).

The Grow Pellets are made of responsibly harvested peat. The peat-free Grow Pellets are made of Coir, an eco-friendly byproduct from the coconut processing industry. We source and process our coconut husks responsibly.

# POTTING SOIL MIX

If you prefer regular Potting Soil Mixes over Botanian Quick Soil Mix Pellets, a full range has been developed with various premium potting soil mixes to grow beautiful and healthy plants of all kinds of crops wherever you can imagine, such as annual plants, terrace plants, houseplants, vegetable plants, and for use as a soil improver. The substrate in these bags is a blend of all kinds of (renewable) materials, ensuring a high-quality mix.

The mixes are available in different sizes and both with responsibly harvested peat or fully peat-free.

Consider using the Soil Mixes to fill your Botanian Grow Pots & Strips.

EASY  
TO  
USE

The Potting Soil Mixes are all RHP Consumer certified, which is the European quality standard for potting soil and substrates. The peat used is RPP certified, which emphasizes it is harvested in a responsibly way.

## HOME GARDENING

### Quick Soil Mix - Grow Plate - Coco Disc

Compressed soil that expands after adding water, filling either Jiffy pots or plastic/decorative containers. Quick Soil Mix is recommended for use with Jiffy pots, while Grow Plates and Coco Discs can also be used to fill decorative containers such as hanging baskets. The Coco Disc, made of husk chips, is especially suitable as ground cover to help prevent weed growth.

### Pellets

Jiffy Pellets are a perfect starting point for the first growing stages, suitable for rooting cuttings or germinating seeds. Most of them do have a Mini Greenhouse that do fit them perfectly, simulating a semi-professional growing environment. The netting keeps the soil together and does not need to be removed when transplanting in a bigger pot or straight into the garden.

### Pots & Strips

Jiffy Pots will provide the best growing results when using them together with our Quick Soil Mix (QSM) or Potting Soil Mix. Most pots do have a QSM size that fills the pot with the right amount of soil to start growing. The Grow Strips can be considered as group of pots together, ideal for seeding one crop in larger quantities. When moisturized sufficiently the cavities within each strip can be separated easily.

## BULK PRODUCT RANGE HOME GARDENING

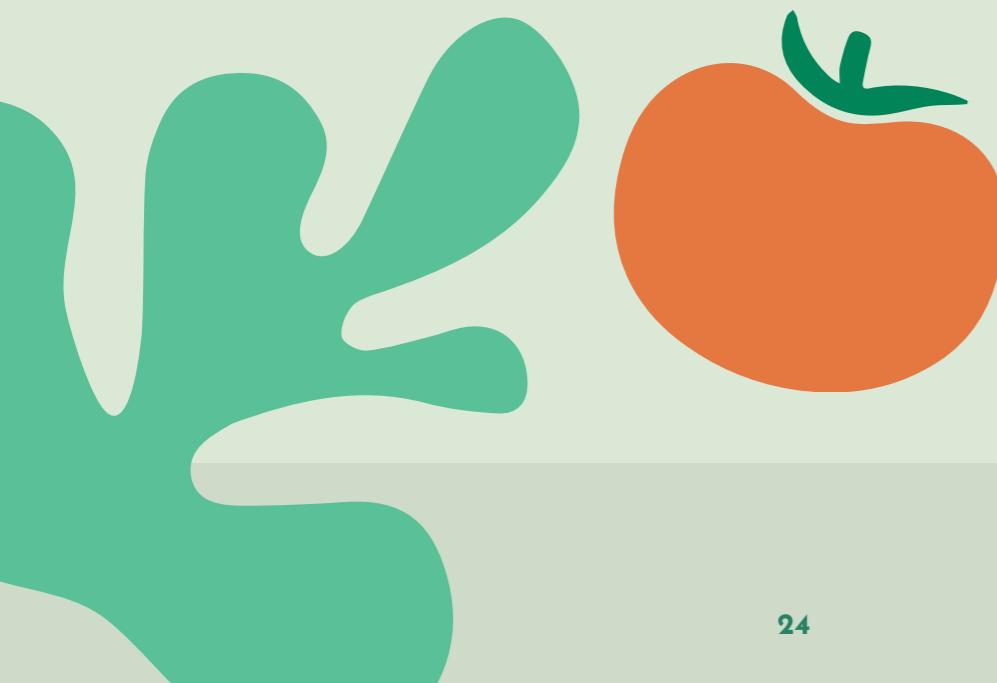

### Pots & Strips

When the crops start developing roots there is no need to remove the pots before transplanting, as the roots will start penetrating the walls of the pots. The pots are environmental friendly and biodegrade over time. The bigger the crop you would like to grow the bigger the pot should be.
